LLUIS PONS BOSCH

Lluís Pons Bosch, was a 9 year old boy who passed away the 16th of August 2021 after a three year battle against a rare type of leukaemia (aCML).

BACKGROUND

Lluís was a keen sports enthusiast and enjoyed football above all

01

STRENGTH

His bravery and resilience in the face of such an ordeal is to be commended

SUPPORT

A huge movement of support
arouse in order to find a bone
marrow compatible donor.
Unfortunately, a match was
never to be found.

02

PURPOSE

The family wants to honour Lluís and express their gratitude to this movement, the club and his team mates by means of organizing an U11 football tournament with his favourite teams.

02

PURPOSE

This memorial wants to
fundraise Leukaemia research
and organizations that help
entertaining the kids while
at hospital

02

PURPOSE

Proceeds generated from the event will go towards the following organisations:

IJC - Instituto de Investigación contra la Leucemia Josep Carreras

www.carrerasresearch.org

With the cells obtained from Lluís's bone marrow, the IJC has managed to establish the first in vivo experimental model available in the world for the study of paediatric CMLa.

With this information we will be able to find the specific characteristics that differentiate adult from and paediatric CMLa, which could be decisive in improving the way in which the disease is treated in children.

Thanks to the experimental model generated, we will be able to test the effectiveness of these treatments and find new therapeutic strategies that can help other children suffering from this disease in the future.
